1. Coal business

(1) Coal Production

In the first half of 2011, the raw coal production of the Group was 25.73 million tonnes, representing an increase of 2.84 million tonnes or 12.4% compared with that of the first half of 2010. Salable coal production of the Group for the reporting period was 23.59 million tonnes, representing an increase of 2.03million tonnes, or 9.4%, compared with that of the first half of 2010. The increase of coal production was mainly due to: (1) consolidation of coal production by Ordos Neng Hua; and (2) coal production by Yancoal Australia increased as compared with that of the first half of 2010;

The following table sets out the coal production of the Group for the first half of 2011;

	For the six months ended 30 June 2011 Kiloton	For the six months ended 30 June 2010 Kiloton	Increase/ decrease Kiloton	Increase/ decrease (%)

Yancoal Australia	Total cost of sales	RMB'000	2,146,874	1,328,679	818,195	61.58
	Cost of sales per tonne	RMB	453.85	439.20	14.65	3.34
Externally purchased coal	Total cost of sales	RMB'000	2,395,130	1,493,902	901,228	60.33
	Cost of sales per tonne	RMB	757.71	720.65	37.06	5.14

In the first half of 2011, the cost of coal sales of the Company was RMB 4.6368 billion, representing an increase of RMB 448 million or 10.7% compared with that of the first half of 2010. The cost of coal sales per tonne was RMB 286.20, representing an increase of RMB 32.21 or 12.7% compared with that of the first half of 2010. This was due to: (1) an increase in material prices resulting in an increase in the cost of coal sales per tonne by RMB 6.72; and (2) an increase in employees' wages resulting in an increase in the the cost of coal sales per tonne by RMB 22.14.

In the first half of 2010, the cost of coal sales of Shanxi Neng Hua was RMB 170.1 million, representing an increase of RMB 1.27 million or 0.8% compared with that of the first half of 2010; the cost of coal sales per tonne was RMB312.66, representing an increase of RMB96.59 or 44.7%. This was due to a decrease in the sales volume of saleable coal by 0.24 million tonnes or 30.3%, resulting in an increase in the fixed unit cost per tonne.

In the first half of 2011, the cost of coal sales of Heze Neng Hua was RMB 516.6 million, representing an increase of RMB 237.5 million or 85.1% compared with that of the first half of 2010; the cost of coal sales per tonne was RMB 715.47, representing an increase of RMB 141.06 or 24.6% compared with that of the first half of 2010. This was due to the fact that the coal mine is at its initial stage of commercial production with a relatively low rate of salable coal output and the increased equipment and material input and the number of employees deployed. Of which: (1) the increase of cost per raw coal production and amortized per sales volume of salable coal have led to an increase in the cost of coal sales per tonne by RMB49.04; (2) the increase of wages of employees have led to an increase in the cost of coal sales per tonne by RMB40.39; (3) the increase of mining machinery leasing expenses has resulted in an increase in the cost of coal sales per tonne by RMB38.79.

2. Railway Transportation Business

In the first half of 2011, the transportation volume of the Railway Assets for the finished products was 9.09 million tonnes, representing a decrease of 0.84 million tonnes or 8.5% as compared with that of the first half of 2010. Income from railway transportation services of the Company (income from transported volume settled on the basis of off-mine prices and special purpose railway transportation fees borne by customers) was RMB242.9 million in the first half of 2011, representing a decrease of RMB15.373 million or 6.0% as compared with that of the first half of 2010. The cost of sales of railway transportation services was RMB 156.7 million, representing an increase of RMB 6.496 million or 4.3% as compared with that of the first half of 2010.

4 Others

(1) Debt to Equity Ratio

As at 30 June 2011, the equity attributable to the equity holders of the Company and the total borrowings amounted to RMB 39.8454 billion and RMB 29.9587 billion, respectively, with a debt to equity ratio of 75.2%.

For detailed information on the debt borrowings, please refer to note 22 of the financial statements prepared under IFRS or the note VIII.20, VIII.28 and VIII.29 of the financial statement prepared under CASs.

(2) Capital Resources and Use

In the first half of 2011, the Group's principal source of capital was the cash flow from operations and bank loans. The Group has utilized its capital mainly for payment of operating expenses, purchase of property, machinery and equipment, payment of dividends to its Shareholders, payment of the acquisition of assets and equity interests.

The Group's capital expenditure for the purchase of property, machinery and equipment for the first half of 2011 was RMB 8.8664 billion, representing an increase of RMB 7.6151 billion or 608.6% as compared with RMB 1.2513 billion in the first half of 2010. This was mainly due to: (1) the expenditure of Ordos Neng Hua for the purchase of property, machinery and equipment increased by RMB 7.9991 billion as compared with that of the first half of 2010; and (2) the expenditure of Yancoal Australia for the purchase of property, machinery and equipment decreased by RMB 486.3 million as compared with that of the first half of 2010.

(3) The Impacts of Exchange Rate Changes on the Company

China implements a regulated and managed floating exchange rate system based on market supply and demand by reference to a basket of currencies.

The impacts of exchange rate fluctuations on the Group were mainly reflected in:

- (i) the overseas coal sales income is calculated in U.S. dollars and Australian dollars which has an impact on the overseas coal sales of the Group;
- (ii) the exchange gains and losses of the foreign currency deposits and borrowings. The exchange rate of AUD to USD was 1.0739 as at 30 June 2011, compared to that of 1.0163 as at 31 December 2010. Affected by the change of exchange rate, Yancoal Australia had gains of foreign exchange of RMB1.2322 billion in the first half of 2011. As at 17 August 2011, the exchange rate of AUD to USD was 1.0490.
- (iii) the cost of imported equipment and accessories of the Group.

To manage the foreign currency risk of the expected revenue, Yancoal Australia, the Group's subsidiary in Australia, has entered into a foreign exchange hedging contract with a bank. For more details, please refer to note VIII.2 and note VIII.21 of the financial statement prepared under CASs.

Save as disclosed above, the Group did not take foreign exchange hedging measures on other foreign currencies and did not plan to further hedge the exchange rate between RMB and foreign currencies.

(4) Contingent liabilities

For details of the contingent liabilities, please see note 31 of the financial statements prepared under the IFRS.

(5) Pledge of assets

The Company has not pledged any of its assets in the current reporting period.

(6) Taxation

In the current reporting period, the Company and all of its subsidiaries incorporated in the PRC are subject to an income tax rate of 25% and Yancoal Australia is subject to a tax rate of 30% on its taxable profits.

(III) Capital Expenditure Plan

The capital expenditure for the first half of 2011 and the estimated capital expenditure for the second half of 2011 of the Group are set out in the following table:

(V) Outlook

1. Market outlook of the second half of 2011

Outlook for coal market

With an increase in supply in the domestic coal market and a stable but increasing demand, the supply and demand of coal will generally be in balance. The domestic economy maintains a stable development; with continued increase in investment by local governments at different levels and the commencement of low-income housing construction, the demand for coal for coal-consumption industries' (mainly including steel, cement, glass industries) will increase. On the other hand, the demand for coal will to a certain extent be restrained by the implementation of stricter energy-saving and emission reduction measures, and elimination of outdated production facilities. The domestic coal supply will increase due to the continuous increase in coal production in Shanxi province and Inner Mongolia, the implementation of State government's policy of keeping efficient supply of coal and the decrease in coal export. Although the coal transportation capacity has increased, the structural bottle neck in production, transportation and demand is still constraining effective supply/delivery. It is possible that urgent demands for certain types of coal in certain geographical locations at a particular time. The coal price will have support due to the high imported coal prices and high seasonal demands during winter time. Further, uncertainty in the global economic growth may have an impact on coal price. The rapid formation of coal conglomerates and acceleration of integration of coal resources and reshuffle of coal enterprises will further increase the centralization of the coal industry and enhance the market competitiveness of large coal enterprises. It is expected that the coal price will remain stable on the whole and may fluctuate in small amplitude at a high level in the second half of the year.

The increasing demand for coal from the international market and the limited growth in supply will keep coal price hover at a high level. Among the major coal importing countries, the conflict between demand and supply in India is prominent and import will continue to grow. China's net import momentum will continue. Given the post-earthquake recovery and reconstruction, Japan's demand will increase. The coal demand in Asia Pacific region is strong. The exporting capability of Australia is recovering. Despite their improved ability to supply, the volume of export coal from major exporters like Indonesia, South Africa and Russia are still restricted by their railway and port infrastructure facilities. The international coal prices will be further supported by the adjustment of coal export policies of countries such as Vietnam and Indonesia. The depreciation of US dollar will bolster the prices of dollar-denominated bulk commodities in the international market. It is predicted that international coal prices will continue to sway at a high level in the second half of the year.

Outlook for the methanol market in China

Affected by the supply and demand relationship, it is predicted that the domestic methanol market will be in a fluctuating trend in the second half of the year. Due to the increase in operation rate of the domestic methanol plants and the stable import of methanol, the domestic supply of methanol shall further increase. Meanwhile, as the operation rates of plants producing downstream products such as formaldehyde, dimethyl ether and acetic acid slowly recovers, the demand for methanol will increase. Further, measures such as accelerated elimination of outdated production capacity of methanol, increased threshold for new methanol projects, promotion of methanol fuel for vehicles and production quota for methanol producing enterprises will be advantages to keep the domestic methanol market stable. The surge in prices of raw materials including coal and natural gas, costs of electricity and transportation and prices of oil products will provide a strong support for methanol prices. It is predicted that there will be no fundamental change in the overall domestic price of methanol.

2. Operational Strategies

In the second half of 2011, the Company will continue to consolidate and deepen the strategy of “Second Venture, Rapid Development” to sustainably enhance its profitability and shareholders’ return. The Company will focus on the following operating strategies:

Strengthening production and operation management; enhancing its economies of scale. Firstly, the Company will enhance its fundamental safety management and precautionary safety measures to ensure a sustainable and stable development environment for the Company. Secondly, the Company will deepen the implementation of the production organization strategy of “Consolidating the Company, Establishing New Ventures and Overseas Expansion” to fully capitalize on coal as our principal business to ensure a new high for the Company’s total coal production. Thirdly, the Company will accelerate its integration into the international marketing system, in order to achieve synergy from the international and domestic markets. Flexible sales strategies in response to the market supply and demand will be implemented to maximize profits. Fourthly, the Company will strengthen its financial control and establish a global cash management system. Focusing on cost control, the Company will engage in reduction of costs and energy consumption to ensure effective cost control. The Company will also further enhance capital budget management, strengthen cash flow control and improve the utilization of capital.

Combining industrial development and capital operation to push forward the Company’s expansion and development. Firstly, the Company will focus on strategic merger and acquisition of resources. Leveraging on the edges of resources integration at Yulin in Shaanxi province and Ordos City in Inner Mongolia and the increased efforts in merger and acquisition of external resources, the Company will continue to seek new investment opportunities in coal from overseas markets and related industries. Secondly, working capital efficiency will be improved. The pre-listing work of Yancoal Australia Pty is underway. Direct financing channels in different currencies are available by taking advantages of the listing platform, thus providing direct financing at low cost. By speeding up the capitalization of fully-mechanized top coal caving technique and achieving production targets with the use of technology and intellectual properties, overall efficiency will be increased.

The development and construction of existing projects will be expedited. Project investment and operations management will be enhanced to eliminate and control investment risks. Operations have been commenced in the following mines: Wanfu coal mine of Heze Neng Hua, Zhuan Longwan coal mine in Ordos City, Ashton southeastern open-cut mine of Yancoal Australia and the expansion project of Austar coal mine. The establishment of the 0.6 million tonnes methanol project of Ordos Neng Hua is underway. The approval procedure of the compatible coal resources of methanol project and the application procedure of mining rights of Shilawusu coal field of Inner Mongolia Haosheng Company will be speeded up. The expansion and acceptance inspection procedures of Wenyu coal mine of Xintai Coal Company Mining Limited in Ordos City and Anyuan coal mine will be completed. The establishment of Yushuan Coal Mine Company in Shaanxi Province will be accelerated.

The Company will strengthen the management and control system and improve the corporate governance system and operational mechanism to avoid operational risk after listing. It will establish a sound internal control system and implement the "Basic Norms of Internal Control". The control system for its domestic and foreign subsidiaries will be comprehensively enhanced; operating and management activities will be standardized to improve management capability and profitability. Comprehensive risk management is strengthened to increase the risk preventive capability of the Company. Informationalized management and control will be enhanced by integrating with existing information systems to share information resources.

The Company will actively perform its corporate social responsibilities and conduct business in compliance with laws and protect investors' interests with honesty and integrity. The Company will enhance efforts in resource conservation and environmental protection, strengthen its efforts in developing low-carbon economy, implement clean production and to improve combined resource utilization efficiency. Investments in research and development have been increased to enhance the Company's innovation capability. Livelihood of employees is addressed and their legitimate rights and interests are safeguarded. Employees are also provided with working and living environments which comply with safety and health as well as sanitary requirements. The harmonious development of the regional economy is promoted by the Company's active participation in public welfare and community development.

3. Major Risks faced by the Company, Impact and Measures

(1) Risk arising from macro-economy fluctuation

Factors such as the implementation of deflationary monetary policy to curb inflation by the State, downgrade of United State's sovereignty credit rating, the flaring-up of debt crisis in Europe, the lingering effect of the earthquake on the Japanese economy, have impacted the global economy. Recovery of the Group's downstream products market will continue to be affected by fluctuation of the macro-economy and the possibility of such impact is likely to increase, which in turn would have an impact on the operating results of the Group.

Counter-measures: closely monitor the changes of macro-economy and immediately implement response scheme.

(2) Production safety risks

Recently, a number of major accidents have occurred in China. The State has further strengthened its supervision on coal mines safety. Given the high-risk nature of the coal and coal chemical industries and possibilities of extreme natural disasters, production safety risk remains to be the most significant risk faced by the Group.

Counter-measures: comprehensively strengthen the safety measures, continuously intensify the safety alert education, focus on control management of safety risk, investigate and remediate major hidden dangers, carry out interactive inspection and evaluation for production safety.

(3) Risk arising from product price volatility

Affected by factors such as the macro-economy environment and control policy of the State and changes in the supply and demand in domestic and overseas markets, prices of the Group's products are subject to possible higher fluctuations. Price volatility would have a direct impact on the operating results of the Group.

As considered and approved at the seventeenth meeting of the fourth session of the Board on 30 December 2010, the Company increased the capital investment in Yancoal Australia Pty Ltd by AUD 909 million. After completion of registered capital change procedure, the capital investment in Yancoal Australia will be increased from AUD 64 million to AUD 973 million.

10. Increasing the registered capital of Ordos Neng Hua

As approved at the eighteenth meeting of the fourth session of the Board held on 17 January 2011, the Company increased its capital investment in Ordos Neng Hua by RMB 2.6 billion with its own capital. The registered capital of Ordos Neng Hua increased from RMB 500 million to RMB 3.1 billion on 24 January 2011.

VI. CONNECTED TRANSACTIONS

The Group's connected transactions were mainly continuing connected transactions entered into with its Controlling Shareholder (together with its subsidiaries) for the provision of materials and services and connected transactions for joint external investment of them.

(1) Continuing connected transactions

At the second extraordinary general meeting held on 23 December 2008, the five continuing connected transaction agreements and the annual caps for such transactions from 2009 to 2011 had been approved. Prices of these transactions are mainly determined by the price fixed by the State, and if there is no State price available, the market price is used. If there is no market price available, then the actual cost is applied. The charge for supplies can be settled in one lump sum or by installments. The continuing connected transactions made in a calendar month shall be settled in the following month, except for incomplete transactions or where the transaction amounts are in dispute.

As approved at the fourteenth meeting of the fourth session of the Board on 23 April 2010, the Company and Yankuang Group Finance Company Limited entered into the "Financial Service Agreement". The parties agreed on the terms of the continuing connected transactions including the deposits, borrowings, settlement and the proposed annual caps for the transactions from 2010 to 2011. It has been agreed that the rates for the fees charged by Yankuang Group Finance for the financial services to be provided to the Group shall equal to or more favorable than those charged by the major commercial banks in the PRC for the same kind of financial services provided to the Group. Fund risk control measures were also established to safeguard the security of the fund from system's perspective.

CHAPTER 6 SIGNIFICANT EVENTS – CONTINUED

VIII. OTHER EVENTS

(Prepared under the regulatory rules of Hong Kong)

Repurchase, sale or redemption of listed shares of the Company

The 2010 annual general meeting was convened by the Company on 20 May 2011, pursuant to which a general mandate was granted to the Board to issue additional H shares of the Company during the relevant authorized period. Depending on the needs and market conditions, upon obtaining approvals from the relevant PRC regulatory authorities and complying with the relevant laws, regulations and the articles of association of the Company, the issuance amount shall not exceed 20% of the total outstanding number of H shares of the Company as at the date of passing the resolution.

The 2010 annual general meeting, the 2011 first class meeting of the holders of domestic shares and the 2011 first class meeting of the holders of H shares were convened by Yanzhou Coal Mining Company Limited on 20 May 2011, pursuant to which a general mandate was granted to the Board to repurchase H Shares of the Company not exceeding 10% of the aggregate nominal value of H Shares of the Company in issue as at the date of passing the resolution. Under the general mandate, the Board is authorized to repurchase H Shares of the Company during the relevant authorized period and to determine the relevant matters in relation to the repurchase of H shares of the Company according to the needs and market conditions upon obtaining approvals from the relevant PRC regulatory authorities and complying with the relevant laws, regulations and the articles of association of the Company.

As at the date of this interim report, the Company has not exercised the above mentioned general mandates.

Remuneration policy

The remuneration for the Directors, Supervisors and senior management is proposed to the Board by the Remuneration Committee of the Board. Upon review and approval by the Board, any remuneration proposal for the Directors and Supervisors will be proposed to the Shareholders' general meeting for approval. The remuneration for senior management is reviewed and approved by the Board.

The Company adopts a combined annual remuneration and risk control system as the principal means for assessing and rewarding the Directors and senior management. The annual remuneration consists of basic salary and benefit income. The basic salary is determined according to the operational scale of the Company with reference to the market wages and the income of employees, whereas benefit income is determined by the actual operational achievement of the Company. The annual remuneration for the Directors and senior management of the Company are pre-paid on a monthly basis and are cashed after the assessment to be carried out in the following year.

The remuneration policy for the other employees of the Group is principally a position and skill remuneration system, which determines the remuneration of the employees on the basis of their positions and responsibilities and their quantified assessment results. Rewards are linked to the Company's overall economic efficiency.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE SIX MONTHS ENDED 30 JUNE 2011

1. GENERAL

Organization and principal activities

The Group represents Yanzhou Coal Mining Company Limited (the “Company”) and its consolidated subsidiaries.

The Company is established as a joint stock company with limited liability in the People’s Republic of China (the “PRC”) and operates six coal mines, namely the Xinglongzhuang coal mine, Baodian coal mine, Nantun coal mine, Dongtan coal mine, Jining II coal mine (“Jining II”) and Jining III coal mine (“Jining III”) as well as a regional railway network that links these mines with the national railway grid. These six coal mines and the railway were originally divisions of the Company’s ultimate holding company, Yankuang Group Corporation Limited (the “Parent Company”), a state-owned enterprise in the PRC. The Parent Company contributed the assets and liabilities of the Xinglongzhuang coal mine, Baodian coal mine, Nantun coal mine and Dongtan coal mine into the Company upon its formation.

The Company acquired from the Parent Company Jining II, Jining III and the assets of the special purpose coal railway transportation business (“Railway Assets”) in 1998, 2001 and 2002, respectively.

In April 2001, the status of the Company was changed to that of a sino-foreign joint stock limited company.

The Company’s A shares are listed on the Shanghai Securities Exchange (“SSE”), its H shares are listed on The Stock Exchange of Hong Kong Limited (the “SEHK”), and its American Depositary Shares (“ADS”, one ADS represents 10 H shares) are listed on the New York Stock Exchange, Inc.

The Company holds a 52.38% interest in the registered capital of Qingdao Free Trade Zone Zhongyan Trade Co., Ltd. (“Zhongyan”), a limited liability company established and operated in the PRC. Zhongyan is engaged in the trading and processing of mining machinery.

The Company holds a 92% interest in the registered capital of Shandong Yanmei Shipping Co., Ltd. (“Yanmei Shipping”), a limited liability company established and operated in the PRC which is principally engaged in the transportation business via rivers and lakes and sale of coal and construction materials.

In 2004, the Company established Yanzhou Coal Yulin Neng Hua Co., Ltd. (“Yulin”), a 97% owned subsidiary, for the future development of the methanol projects of the Group in the Shaanxi Province in the PRC. In 2008, the Company acquired the remaining 3% equity in Yulin, and then the Company made further investment of RMB600,000,000 in Yulin in the same year.

In 2004, the Company acquired the entire interest in the Southland coal mine located in New South Wales, Australia (“Southland”) from independent third parties in 2004 for aggregate cash consideration of AUD29,377,000 (equivalent to RMB187,312,000 then). The Company has also established two wholly-owned subsidiaries in Australia, namely Yancoal Australia Pty Limited (“Yancoal Australia”) and Astar Coal Mine Pty Limited (“Astar”), in 2004 for the Group’s future operations in Southland.

1. GENERAL – CONTINUED

Organization and principal activities – continued

In 2004, the Company acquired a 95.67% equity interest in Yanmei Heze Company Limited (“Heze”) from the Parent Company at cash consideration of RMB584,008,000. The principal activities of Heze are to conduct the initial preparation of the coal mines at the Juye coalfield which includes obtaining the approvals for the coal mine projects, applying rights to explore for coal and preparing the construction work of the coal mines. The equity interests held by the Company increased to 96.67% after the increase of the registered capital of Heze in 2007. The equity interests held by the Company increased to 98.33% after the increase of the registered capital of RMB 1.5 billion in 2010.

In 2006, the Company acquired a 98% equity interest in Yankuang Shanxi Neng Hua Company Limited (“Shanxi Neng Hua”) and its subsidiaries (collectively referred as the “Shanxi Group”) from the Parent Company at cash consideration of RMB733,346,000. The principal activities of Shanxi Group are to invest in heat and electricity, manufacture and sale of mining machinery and engine products, coal mining and the development of integrated coal technology.

Shanxi Neng Hua is an investment holding company, which holds 81.31% equity interest in Shanxi Heshun Tianchi Energy Company Limited (“Shanxi Tianchi”) and approximately 99.89% equity interest in Shanxi Tianhao Chemical Company Limited (“Shanxi Tianhao”). Shanxi Neng Hua acquired approximate 0.04% equity interest of Shanxi Tianhao at cash consideration of RMB14,000. The principal activities of Shanxi Tianchi are to exploit and sale of coal from Tianchi Coal Mine, the principal asset of Shanxi Tianchi. Shanxi Tianchi has completed the construction of Tianchi Coal Mine and commenced production by the end of 2006. Shanxi Tianhao is established to engage in the production of methanol and other chemical products, coke production, exploration and sales. The construction of the methanol facilities by Shanxi Tianhao commenced in March 2006 and commenced production in 2008. In 2007, the Company further acquired the remaining 2% equity interest in Shanxi Neng Hua at cash consideration of RMB14,965,000.

In 2009, the Company acquired 74% equity interest in Shandong Hua Ju Energy Company Limited (“Hua Ju Energy”) with a consideration of RMB593,243,000. Hua Ju Energy is a joint stock limited company established in the PRC, the principal business is the supply of electricity and heat by utilizing coal gangue and coal slurry produced from coal mining process. In July 2009, the Company entered into acquisition agreements with three shareholders of Hua Ju Energy, pursuant to which, the Company agrees to acquire 21.14% equity interest in Hua Ju Energy with the consideration of RMB173,007,000.

In 2009, the Company entered into a binding scheme implementation agreement with Felix Resource Limited (“Felix”), a corporation incorporated in Australia with shares listed on the Australian Securities Exchange, to acquire all the shares of Felix in cash of approximately AUD3,333 million. The principle activities of Felix are exploring and extracting coal resources, operating, identifying, acquiring and developing resource related projects that primarily focus on coal in Australia. The acquisition was completed in 2009.

In 2009, the Company invested RMB500 million to set up a wholly owned subsidiary located in Inner Mongolia, Yanzhou Coal Ordos Company Limited (“Ordos”). Ordos is a limited liability company incorporated in the PRC with the objectives of production and sale of methanol and other chemical products. The Company invested additional equity in the registered capital of Ordos by RMB2.6 billion during the period.

1. GENERAL – CONTINUED

Organization and principal activities – continued

In 2010, the Company acquired 100% equity interest of Inner Mongolia Yize Mining Investment Co., Ltd (“Yize”) and other two companies with consideration of RMB190,095,000. The main purpose of this acquisition is to facilitate the business of methanol and other chemical products in Inner Mongolia Autonomous Region.

2. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34 “Interim Financial Reporting” and with the applicable disclosure requirements of Appendix 16 of the Rules Governing the Listing of Securities on the SEHK.

3. SIGNIFICANT ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value, as appropriate.

The accounting policies adopted are consistent with those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2010, except a number of accounting policies that are adopted by the Company and effective for annual periods beginning on or after 1 January 2011.

In the current period the Group had applied, for the first time, the new standards and interpretations and revised/amended standards and interpretations (the new “IFRSs”) issued by the International Accounting Standards Board (the “IASB”) and the International Financial Reporting Interpretations Committee (the “IFRIC”) of the IASB, which are effective for the Group’s financial year beginning on 1 January 2011. The new IFRSs relevant to these interim financial statements are as follows:

- IAS 24 (Revised) simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. Government-related entities are now defined as entities that are controlled, jointly controlled or significant influenced by the government. The revised standards still requires disclosures that are important to users of financial statements but eliminates requirements to disclose information that is costly to gather and of less value to users. It achieves the balance by requiring disclosure about these transactions only if they are significant.

The adoption of the new IFRSs had no material effect on the results or financial position of the Group for the current or prior accounting periods. Accordingly, no prior period adjustment has been recognized.

The Group has not early applied the new standards or interpretations that have been issued but are not yet effective. The directors of the Company anticipate that the application of these standards or interpretations will have no material impact on the results and the financial position of the Group.

4. SEGMENT INFORMATION

The Group is engaged primarily in the coal mining business and the coal railway transportation business. The Company does not currently have direct export rights in the PRC and all of its export sales must be made through China National Coal Industry Import and Export Corporation (“National Coal Corporation”) or Minmetals Trading Co., Ltd. (“Minmetals Trading”) or Shanxi Coal Imp. & Exp Group Corp. (“Shanxi Coal Corporation”). The final customer destination of the Company’s export sales is determined by the Company, National Coal Corporation, Minmetals Trading or Shanxi Coal Corporation. Certain of the Company’s subsidiaries and associates are engaged in trading and processing of mining machinery and the transportation business via rivers and lakes and finance services in the PRC. No separate segment information about these businesses is presented in these financial statements as the underlying gross sales, results and assets of these businesses, which are currently included in the coal mining business segment, are insignificant to the Group. Certain of the Company’s subsidiaries are engaged in production of methanol and other chemical products, and invest in heat and electricity.

For management purposes, the Group is currently organized into three operating divisions-coal mining, coal railway transportation and methanol, electricity and heat supply. These divisions are the basis on which the Group reports its primary segment information.

Principal activities are as follows:

Coal mining	–	Underground and open-cut mining, preparation and sales of coal
Coal railway transportation	–	Provision of railway transportation services
Methanol, electricity and heat supply	–	Production and sales of methanol and electricity and related heat supply services

Segment profit represents the profit earned by each segment without allocation of corporate expenses and directors’ emoluments, results of associates, interest income, interest expenses and income tax expenses. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

Reserves
Future Development Fund

Pursuant to regulation in the PRC, the Company, Shanxi Tianchi and Heze are required to transfer an annual amount to a future development fund at RMB6 per tonne of raw coal mined. The fund can only be used for the future development of the coal mining business and is not available for distribution to shareholders.

Shanxi Tianchi is required to transfer an additional amount at RMB5 per tonne of raw coal mined from 2008 onwards as coal mine transformation fund.

Pursuant to the regulations of the Shandong Province Finance Bureau, State-owned Assets Supervision and Administration Commission of Shandong Province and the Shandong Province Coal Mining Industrial Bureau, the Company is required to transfer an additional amount at RMB5 per tonne of raw coal mined from 1 July 2004 to the reform specific development fund for the future improvement of the mining facilities and is not distributable to shareholders. No further transfer to the reform specific development fund is required from 1 January 2008.

24. SHAREHOLDERS' EQUITY – CONTINUED

In accordance with the regulations of the State Administration of Work Safety, the Company has a commitment to incur RMB8 (Shanxi Tianchi: RMB15) for each tonne of raw coal mined from 1 May 2004 which will be used for enhancement of safety production environment and improvement of facilities ("Work Safety Cost"). The Company, Heze and Shanxi Tianchi make appropriation to the future development fund in respect of unutilized Work Safety Cost. In accordance with the regulations of the State Administration of Work Safety, the Company's subsidiaries, Hua Ju Energy and Yulin, have a commitment to incur Work Safety Cost at the rate of: 4% of the sales income for the year below RMB10 million; 2% of the actual sales income for the year between RMB10 million and RMB100 million (included); 0.5% of the actual sales income for the year between RMB100 million and RMB1 billion (included); 0.2% of the actual sales income for the year above RMB1 billion. The unutilized Work Safety Cost at 30 June 2011 was RMB603,361,000.

Statutory Common Reserves Fund

The Company and its subsidiaries in the PRC has to set aside 10% of its profit for the statutory common reserve fund (except where the fund has reached 50% of its registered capital). The statutory common reserve fund can be used for the following purposes:

- to make good losses in previous years; or
- to convert into capital, provided such conversion is approved by a resolution at a shareholders' general meeting and the balance of the statutory common reserve fund does not fall below 25% of the registered capital.

Retained earnings

In accordance with the Company's Articles of Association, the profit for the purpose of appropriation will be deemed to be the lesser of the amounts determined in accordance with (i) PRC accounting standards and regulations and (ii) IFRS or the accounting standards of the places in which its shares are listed.

The Company can also create a discretionary reserve in accordance with its Articles of Association or pursuant to resolutions which may be adopted at a meeting of shareholders.

The Company's distributable reserve as at 30 June 2011 is the retained earnings computed under PRC GAAP which amounted to approximately RMB20,051,423,000 (31 December 2010: RMB19,727,074,000).

27. RELATED PARTY TRANSACTIONS – CONTINUED

Transactions/balances with other state-controlled entities in the PRC

The Group operates in an economic environment currently predominated by entities directly or indirectly owned or controlled by the PRC government (“state-controlled entities”). In addition, the Group itself is part of a larger group of companies under the Parent Company which is controlled by the PRC government. Apart from the transactions with the Parent Company and its subsidiaries and other related parties disclosed above, the Group also conducts business with other state-controlled entities. The directors consider those state-controlled entities are independent third parties so far as the Group’s business transactions with them are concerned.

Material transactions with other state-controlled entities are as follows:

	Six months ended 30 June	
	2011	2010
	RMB’000	RMB’000

The Company entered into a co-operative agreement with two independent third parties to establish a company for acquiring a coal mine in Shanxi province for operations. In addition to the deposit on investment, the Company is committed to invest a further RMB78.8 million.

Pursuant to the regulations issued by the Shandong Province Finance Bureau, the Group has to pay a deposit to the relevant government authority, which secured for the environmental protection work done by the Company. As at 30 June 2011, the Company is committed to further make security deposit of RMB1,758 million.

28. COMMITMENTS – CONTINUED

In 2010, the Company entered into a co-operative agreement with three independent companies to acquire 51% equity interest of Inner Mongolia Haosheng Coal Mining Limited (“Hao Sheng”) at a consideration of RMB6,649 million and to obtain the mining rights of the Shilawusu Coal Field in name of Hao Sheng. During the period, the Company entered into a co-operative agreement with two independent companies to acquire additional 10% shareholding of Hao Sheng at a consideration of RMB1,313,760,000. The Company also agreed to increase the registered capital of Hao Sheng by RMB51 million. Up to the date of these financial statements, the Company has invested RMB2,439,880,000 in relation to this acquisition.

On 24 January 2011, the Company, the Parent Company, and Shaanxi Yanchang Petroleum (Group) Corp. Ltd (“Yanchang Petroleum”) entered into an agreement for the formation of Shaanxi Future Energy Chemical Corp. Ltd. Upon completion of the agreement, the Parent Company, the Company and Yanchang Petroleum will contribute RMB2.7 billion, RMB1.35 billion and RMB1.35 billion as capital contribution and will hold 50%, 25% and 25% equity interest in the investee company respectively. Up to the date of these financial statements, Shaanxi Future Energy Chemical Corp. Ltd. has been incorporated and the Company has invested RMB540,000,000 as capital contribution.

29. RETIREMENT BENEFITS

Qualifying employees of the Company are entitled to a pension, medical and other welfare benefits. The Company participates in a scheme of the Parent Company and pays a monthly contribution to the Parent Company in respect of retirement benefits at an agreed contribution rate based on the monthly basic salaries and wages of the qualified employees. The Parent Company is responsible for the payment of all retirement benefits to the retired employees of the Company.

Pursuant to the Provision of Insurance Fund Administrative Services Agreement entered into by the Company and the Parent Company on 7 November 2008, the monthly contribution rate is set at 20% of the total monthly basic salaries and wages of the Company’s employees for the period from 1 January 2009 to 31 December 2011. Retirement pension and other welfare benefits will be provided by the Parent Company on the actual cost basis, which will be reimbursed by the Company after the actual payment made by the Parent Company.

The Company’s subsidiaries are participants in a state-managed retirement scheme pursuant to which the subsidiaries pay a fixed percentage of its qualifying staff’s wages as a contribution to the scheme. The subsidiaries’ financial obligations under this scheme are limited to the payment of the employer’s contribution. The Group’s overseas subsidiaries pay fixed contribution pension under the law and regulation of the corresponding country.

At the balance sheet date, there were no forfeited contributions which arose upon employees leaving the above schemes available to reduce the contributions payable in future years.

30. HOUSING SCHEME

The Parent Company is responsible for providing accommodation to its employees and the domestic employees of the Company. The Company and the Parent Company share the incidental expenses relating to the accommodation at a negotiated amount for each of the six months ended 30 June, 2011 and 2010. Such expenses, amounting to RMB70,000,000 and RMB70,000,000 for each of the six months ended 30 June, 2011 and 2010, have been included as part of the social welfare and support services expenses summarized in note 27.

The Company currently makes a fixed monthly contribution for each of its qualifying employees to a housing fund which is equally matched by a contribution from the employees. The contributions are paid to the Parent Company which utilizes the funds, along with the proceeds from the sales of accommodation and, if the need arises, from loans arranged by the Parent Company, to construct new accommodation.

SUPPLEMENTAL INFORMATION

I. SUMMARY OF DIFFERENCES BETWEEN CONSOLIDATED FINANCIAL STATEMENTS PREPARED UNDER INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) AND THOSE UNDER THE PRC ACCOUNTING RULES AND REGULATIONS (“PRC GAAP”)

The Group has also prepared a set of consolidated financial statements in accordance with relevant accounting principles and regulations applicable to PRC enterprises.

The consolidated financial statements prepared under IFRS and those prepared under PRC GAAP have the following major differences:

(1) Future development fund and safety work expense

- (1a) Appropriation of future development fund is charged to income before income taxes under PRC GAAP. Depreciation is not provided for plant and equipment acquired by utilizing the future development fund under PRC GAAP but charge to expenses when acquired;
- (1b) Appropriation of the work safety cost is charged to income before taxes under PRC GAAP. Depreciation is not provided for plant and equipment acquired by utilizing the provision of work safety cost under PRC GAAP but charge to expenses when acquired.

(2) Consolidation using purchase method under IFRS and using common control method under PRC GAAP

- (2a) Under IFRS, the acquisitions of Jining II, Railway Assets, Heze, Shanxi Group and Hua Ju Energy have been accounted for using the purchase method which accounts for the assets and liabilities of Jining II, Railway Assets, Heze, Shanxi Group and Hua Ju Energy at their fair value at the date of acquisition. Any excess of the purchase consideration over the fair value of the net assets acquired is capitalized as goodwill.

Under PRC GAAP, as the Group, Jining II, Railway Assets, Heze, Shanxi Group and Hua Ju Energy are entities under the common control of the Parent Company, the assets and liabilities of Jining II, Railway Assets, Heze, Shanxi Group and Hua Ju Energy are required to be included in the consolidated balance sheet of the Group at historical cost. The difference between the historical cost of the assets and liabilities of Jining II, Railway Assets, Heze, Shanxi Group and Hua Ju Energy acquired and the purchase price paid is recorded as an adjustment to shareholders' equity.

- (2b) Under IFRS, the mining rights of Shanxi Group are stated at purchase consideration less amortization. Mining rights (coal reserves) are amortized on unit of production basis. Under PRC GAAP, as both the Group and Shanxi Group are entities under the common control of the Parent Company, the mining rights have to be restated at nil cost and no amortization on mining rights will be recognized.

(3) Deferred taxation due to differences between the financial statements prepared under IFRS and PRC GAAP.

I. SUMMARY OF DIFFERENCES BETWEEN CONSOLIDATED FINANCIAL STATEMENTS PREPARED UNDER INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) AND THOSE UNDER THE PRC ACCOUNTING RULES AND REGULATIONS (“PRC GAAP”) – CONTINUED

The following table summarizes the differences between consolidated financial statements prepared under IFRS and those under PRC GAAP:

The accompanying notes are parts of the financial statements.

I. GENERAL

Yanzhou Coal Mining Company Limited (the “Company”) is a stock company with limited liability established in the People’s Republic of China (the “PRC”). The Company was established in September, 1997 by Yankuang Group Corporation Limited (the “Yankuang Group”) in accordance with the Tigaisheng (1997) No. 154 document issued by “National Economic System Reform Commission of People’s Republic of China. The address of the registered office is Zoucheng City, Shandong Province. The total share capital was RMB1,670 million with Par value per share of RMB1.00 when the Company was set up.

As approved by Zhengweifa (1997) No.12 document issued by Securities Committee of State Council, the Company issued H shares with face value of RMB820 million to Hong Kong and international investors in March 1998. The American underwriters exercised the excessive issue option and the Company issued additional H Shares of RMB30 million. The above shares were listed and traded on Stock Exchange of Hong Kong Limited on April 1, 1998, and the American Depository Shares was listed in the New York Stock Exchange on March 31, 1998. The total share capital has changed to RMB2,520 million after these issues. The company issued 80 million new A shares in June 1998. The above shares went public and were traded on Shanghai Stock Exchange since July 1, 1998. After many issues and bonus shares, the share capital of the Company increased to RMB4,918.40 million by 30 June 2011.

The Company and its subsidiary companies (hereinafter collectively referred to as the “Group”) are mainly engaged in the coal mining and preparation, coal sales, cargo transportation by self-operated railways, road transportation, port operation, comprehensive scientific and technical service for coal mines, methanol production and sales etc.

II. THE PREPARATION FOUNDATION OF FINANCIAL STATEMENTS

The Group takes going concern as the basis of financial statements. The financial statements are prepared in according with the Accounting Standards for Business Enterprises (hereinafter referred to as “new CASs” or “ASBEs”) and No.38 specific accounting standard issued by the Ministry of Finance (MOF) on February 15, 2006, and later issued application guide to the ASBE, the interpretation of ASBE and relevant regulations, and *Information Disclosure and Presentation Rules for Companies Making Public Offering No. 15 – General Provisions on Financial Reporting (Revised 2010)* issued by China Securities Regulatory Commission.

III. DECLARATION OF COMPLIANCE WITH ASBES

The financial statements of the Group have been prepared in accordance with the new ASBEs and have been presented completely and genuinely with the financial information of the Group such as its financial position, operating results and cash flows and so on.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS

1. Accounting period

The accounting period is from the Calendar year January 1st to December 31st.

2. Functional currency

The functional currency of the Company except overseas subsidiaries is Renminbi (RMB). As the primary economic environment for overseas subsidiaries of the Company, Yancoal Australia Pty Limited and its subsidiaries are in Australia, the functional currency of the two Companies is AUD. On the conversion method from AUD to RMB, please refers to 5.5.

3. Basis of accounting and principle of measurement

The Company has adopted the accrual basis of accounting and used the historical cost convention as the principle of measurements for assets and liabilities except for tradable financial assets, available-for-sale financial assets and hedging instruments, which are measured at their fair values.

4. Cash and cash equivalents

Cash in cash flow are cash on hand and deposits available for payment at any time. Cash equivalents in cash flow are investments which are short-term (normally become due within 3 months after purchasing date), highly liquid, readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

5. Foreign currency and the translation of financial statements denominated in foreign currency

(1) Foreign currency translation

Foreign currency transactions are converted to the functional currency at the spot exchange rate of the day when the transaction occurs. At the balance sheet date, foreign currency monetary items are translated to the functional currency using the spot exchange rate of the day. Exchange differences arising are recognized in profit or loss for the current period, except for the exchange differences arising on the borrowing costs eligible for acquisition, construction or production of assets which are qualified for capitalization. Foreign currency non-monetary items measured at fair value are translated using the exchange rates at the date when the recognized fair value is determined. The differences between the amount of the functional currency before and after conversion are recognized in profit or loss or interests of shareholders as changes of fair value. Foreign currency non-monetary items measured at historical cost are translated at the spot exchange rates at the date of the transactions, and do not change the RMB amount.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

5. Foreign currency and the translation of financial statements denominated in foreign currency – continued

(2) Translation of financial statements denominated in foreign currency

The asset and liability items on the balance sheet of foreign currency are converted to RMB at the spot exchange rate of the balance sheet date; other items are converted at the spot exchange rate of the day when the transaction occurs, except retained earnings on shareholders' equity. The revenue and expense items on the income statement of overseas subsidiaries are converted to RMB at the approximate rate of the spot exchange rate of the day when the transaction occurs. Exchange differences arising from the above issues are presented separately under the shareholders' equity items.

Cash flows denominated in foreign currency or from a foreign subsidiary are translated at the approximate rate of the spot exchange rate of the day when the transaction occurs. The effect of fluctuations of exchange rates on cash and cash equivalents is presented separately as a reconciling item in the cash flow statement.

6. Financial assets and financial liabilities

(1) Financial assets

Upon initial recognition, financial assets are classified into the following categories: financial assets at 'fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'.

1) *Financial assets at FVTPL:*

A financial asset is held for trading if it has been acquired principally for the purpose of selling in the short term and presented as the tradable financial assets in the balance sheet. Except for the purpose of hedging, derivative financial instruments are classified into financial assets or liabilities at FVTPL.

2) *Held-to-maturity investment*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity date that the enterprise has the clear intention and ability to hold to maturity.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

6. Financial assets and financial liabilities – continued

(1) Financial assets – continued

3) *Receivables:*

Non-derivative financial assets with fixed or determinable payments are not quoted in an active market.

4) *AFS financial assets*

AFS financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as (1) financial assets at FVTPL, (2) loans and receivables, or (3) held-to-maturity investments.

Financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets at fair value through profit or loss) are added to or deducted from the fair value of the financial assets, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are recognized directly in profit or loss. Financial assets are no longer recognised when the rights to receive cash flows from the assets expire or, the financial assets are transferred and the Group has transferred substantially all the risks and rewards of ownership of the financial assets.

Financial assets and AFS financial assets at FVTPL are subsequently measured at fair value. The receivables and held-to-maturity investments are carried at the amortized cost using the effective interest rate method.

Changes in fair value of financial assets at FVTPL are included in profit or loss for the period at fair value. The received interest during the period holding assets shall be recognized as investment income. On disposing of it, the difference between fair value and initial accounting value shall be recognized as in profit or loss statements on investment, and the profit or loss at the fair value is also adjusted accordingly.

The changes in fair value of AFS financial assets are recorded in the shareholder's equity. The interest calculated by actual interest rate during the period holding assets shall be recognized as investment income. The cash dividends on investments in an available-for-sale equity instrument shall be recorded into the investment income when cash dividends are declared and issued by the investee. On disposing it, the difference after changing the fair value accumulated amount from the amount received and the carrying amount deducting the original shareholder's equity shall be recorded into the investment profit and loss.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

6. Financial assets and financial liabilities – continued

(1) Financial assets – continued

The Company estimates the carrying amount of a financial asset at the balance sheet date (other than those at FVTPL). If there is objective evidence that the financial asset is impaired, the Company shall determine to accrue the amount of any impairment loss. If the fair value of an AFS financial asset declines substantially or non-temporarily, the accumulated loss arising from this decline that had been recognized directly in shareholders' equity shall be recognized in the profit or loss statement.

(2) Financial liabilities

Upon initial recognition, financial liabilities are classified as either financial liabilities 'at fair value through profit or loss' (FVTPL) or 'other financial liabilities'.

Financial liabilities are classified as at FVTPL where the financial liability is either held for trading or it is designated as at FVTPL. Financial liabilities at FVTPL are subsequently measured at fair value, with gains or losses arising from changes in fair value as well as dividends and interest income related to such financial liabilities recognized in profit or loss for the period.

Other financial liabilities are subsequently measured at unamortized cost using the effective interest method.

(3) Method of fair values recognition of financial assets and financial liabilities

If there is an active market for financial instrument, the quoted market price in an active market is used to determine the fair value of the financial instrument. In the active market, financial assets held or financial liabilities intending to bear by the Group take the current quoted price as the fair value of the relevant assets and liabilities. Financial assets intending to buy or financial liabilities borne by the Group take the current offer price as the fair value of the relevant assets and liabilities. If there are no quoted price and offer price for financial assets and liabilities, and the economic conditions do not change significantly after the latest transaction, the latest quotation is used to determine the fair value of such financial assets or liabilities.

If there no active market for financial instrument, the fair values are determined by evaluation method, including to consult the latest prices in the marketing transaction by the parties who are familiar with the market and make the transaction Voluntarily, the current fair values of the other identified financial assets, discounted method of cash flow and options pricing modes.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

6. Financial assets and financial liabilities – continued

(3) Method of fair values recognition of financial assets and financial liabilities – continued

The fair values of forward foreign exchange contracts of the Company and its overseas subsidiaries shall be determined by the market exchange rate at balance sheet date. Fair values of coal swap contracts shall be determined by the market price of forward coal market at balance sheet date. Fair values of interest swap contracts of the Company and its overseas subsidiaries shall be determined by the present value of estimated future cash flows.

7. Accounting method for bad debt provisions of the receivables

The following situations are considered as criterion of recognizing bad debt as loss of receivables: revocation, bankruptcy, insolvency, seriously shortage of cash flows, out of business caused by serious natural disaster and unable to pay off the debt within the foreseeable time, other solid evidence indicating that debt can't be recovered or be of a slim chance.

The allowance method is applied to the possible loss of bad debt, the impairment shall be assessed separately or in combination, the Company shall be determined to accrue the bad debt provisions which shall be calculated into the current profits and losses. If there is defined evidence for the receivables not to or not likely to be received, which shall be classified into the loss of bad debt and write off the accrued bad debts provisions after going through the approval procedure of the Company.

(1) The receivables with individual significant amount accruing bad debts provisions

Judgment basis or amount standards of individual significant amount

The receivables with more than RMB 8 million individual amount shall be classified into the significant receivables;

The accruing method of the receivables with individual significant amount

The bad debt provisions shall be accrued based on the difference between current value of future cash flow and the carrying amount.

(2) Accruing the bad debt provision according to the portfolio

The basis of portfolio

Accounting aging

Use the accounting aging of the receivables as the credit risk characteristics to classify the portfolio

Risk-free

Use the amount characteristics of the receivables, the relation with transaction party and its credit as characteristics to classify the portfolio

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

7. Accounting method for bad debt provisions of the receivables – continued

(2) Accruing the bad debt provision according to the portfolio – continued

The accrual method

Accounting aging

Accrue the bad debt provision by accounting aging analysis method

Risk-free

Not accrue the bad debt provision

The percentage of bad debt provision is as followings according to accounting aging:

Accounting aging	Accrual percentage of the receivables	Accrual percentage of other receivables
Within 1 year	4%	4%
1-2 years	30%	30%
2-3 years	50%	50%
Over 3 years	100%	100%

(3) The individually insignificant receivables accruing the bad debt provision

Accrual reason

The individual amount is not significant, but the accrued bad debt provision on the basis of portfolio can not reflect its risk.

Accrual method

The bad debt provisions shall be accrued based on the difference between current value of future cash flow and the carrying amount.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

8. Inventories

- (1) the classification of inventories: The inventories include the raw materials, coal stock, methanol stock, low value consumables and so on.
- (2) the pricing method of receiving and issuing inventories: The Company adopts a perpetual inventory system to calculate its inventory, using the actual cost pricing for procurement and inventories, and weighted average approach for consumptions and delivery of inventories.
- (3) The end-of-period inventories are measured at the lower one between the cost and the convertible net value. If the inventories are damaged, become partially or completely obsolete or sold at price lower than cost, unrecoverable cost shall be estimated and recognized as a provision for decline in value. The excess of cost over the convertible net value is generally recognized as provision for decline in value of inventories on a separate inventory item basis.
- (4) Net realisable value of inventories directly for sale, such as commodity stocks and materials for sale, is the estimated selling price less the estimated costs necessary to make the sale and other related taxes; Net realisable value of material stocks for product is the estimated selling price less the estimated costs, the estimated marketing cost and other related taxes of the finished production occurred

9. Long-term equity investments

Long-term equity investments mainly includes equity investments held by the Group which exercise control, joint control or significant influence on the investee, which has no control, joint control or significant influence on the investee, and which has no offer in active market and whose fair values cannot be reliable measured.

Joint control means mutual control over certain economic activities under contract. The main basis to define joint control is that any party of the joint venture cannot control the production and business operations of the venture individually, and the decisions involving the basic production and business operations need the unanimous consent from all parties.

Significant influence means that the investor has the right to participate decision-making for the finance and operating policies of investee and has no control or joint control with other parties on policies-making. The main basis to define significant influence is that the Group holds directly or indirectly through subsidiaries above 20% (included) but less than 50% voting shares of investee. Significant influence cannot be recognized if there is solid evidence indicating that the investor cannot participate the decision-making of investee.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

9. Long-term equity investments – continued

For a business combination involving enterprise under common control, the initial investment cost of the long-term equity investment is the carrying amount of the owner's equity of the party being absorbed at the combination date. For a business combination not involving enterprises under common control, the initial investment cost of the long-term equity investment acquired is the aggregate of the fair value, at the acquisition date, of the acquiree's identifiable assets, liabilities and contingent liabilities acquired.

For a long-term equity investment acquired by cash payment, the initial investment cost shall be the actual purchase price that has been paid. Initial investment cost also includes those costs, taxes and other necessary expenditures directly attributable to the acquisition of the long-term equity investment. For a long-term equity investment acquired by the issue of equity securities, the initial investment cost shall be the fair value of the securities issued. A long-term equity investment invested by investors, the initial investment cost use the values described in investment contract or agreement. For a long-term equity investment acquired by debts re-organization or non-currency assets transaction, the initial investment cost shall be recognized in accordance with relevant accounting standards.

The cost method is applied in calculating the subsidiaries investment, equity method used in adjusting the consolidated financial statements. If the Company does not have joint control or significant influence over the investee, the investment is not quoted in an active market and its fair value cannot be reliably measured, a long-term equity investment shall be calculated using the cost method. If the Company does not have control, joint control or significant influence over the investee and the fair value of the long-term equity investment can be reliably measured, the investment shall be calculated as an available-for-sale financial asset.

Under the cost method, long-term equity investments are measured at initial investment cost, and the investment cost shall be adjusted when the investments are added and recovered. Under the equity method, the current investment profit and loss are the net profits and losses created by the investee and shared by the Company. The share of net profits or losses from the investee should be confirmed, based on the fair values of identifiable assets on the acquisition date, according to the accounting policies and accounting period of the Group, offsetting inter-segment transactions profit and loss created by joint venture and associated enterprises which belong to the investor in terms of shares proportion, and after adjusting the net profit from investee. The Group shall, if there is debt balance relating to the long-term equity investment on the joint venture and associates hold before the executing date, deduct the debt balance which should amortize within remaining term, and recognise the investment profits and losses.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

9. Long-term equity investments – continued

For the reason of decreasing investment, the Group no longer has any joint control or significant influence on the investee, and in active market the long-term equity investment, which has no offer and fair values and cannot be reliably measured, shall be measured by cost method. For the reason of increasing investment, the Group is able to exercise control over the investee, the measurement shall be changed into cost method. For the reason of increasing investment, the Group is able to exercise joint control or significant influence but unable to exercise control on the investee, or for the reason of disposal of investment, the Group is unable to exercise control but able to exercise joint control or significant influence over the investee, the measurement shall be changed into cost method.

When long-term equity investment is disposed, the difference between the carrying value and the actual consideration is recognized as investment return of the period; under equity method, the long-term equity investments, which is recognized as shareholder's equity of the investor arising on the change of investee's shareholder equity (other than net loss and profit), is included in investment return of the period according to the relevant proportion.

10. Fixed assets

- (1) Recognition of fixed assets: Fixed assets are tangible assets that are held for production or operation, and have a service life more than one accounting year.
- (2) Category of fixed assets: Buildings, coal mine buildings, ground buildings, railway structure, harbour works and craft, plant, machinery and equipment, transportation equipment, land etc.
- (3) Measurement of fixed assets: The fixed assets shall be initially measured at actual cost of acquisition considering the effect of any expected costs of disposing the asset. Among these, the costs of outsourcing fixed assets include duties and expenses such as purchasing cost, VAT, import tariff, other expenses incurred to ensure estimated usage of the fixed assets that can be directly included in the assets. The costs to build the fixed assets include necessary expenses incurred to ensure the usage status of the assets. The accounting value of the fixed assets invested by the investors shall be accordance with the values specified in the investment contract or agreement, while for not fair value specified in the contract or agreement, shall be regarded as fair value in accounting value. Fixed assets by financial lease are recognized at the lower of fair value of such assets at leasing date and the present value of minimum lease payment.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

10. Fixed assets – continued

- (4) Subsequent expenditure of fixed assets: the subsequent expenditure includes expenses for repair, renovation and improvement, which shall be recognized as fixed asset cost provided that the expenditures confirm to the conditions of fixed assets recognition. With regard to the replaced parts, the carrying value shall not be recognized and other subsequent costs incurred shall be recognized in the gain and loss in the period.
- (5) Depreciation approach of fixed assets: The depreciation is provided to all fixed assets except those that have already accrued depreciation and lands category. The mining structures are depreciated using the estimated production capacity method, and other fixed assets using the average service life method, calculating depreciation rate by month and record it into the current cost or expenses of relevant assets according to their various purposes. The Group's estimated residual value for fixed assets is 0-3%, the estimated residual rate; useful life and annual depreciation rate of each category of fixed assets using the composite life method are as follows:

No.	Category	Useful life (years)	Estimated residual value rate (%)	Annual depreciation rate (%)
1	House Buildings	10-30	0-3	3.23-10.00
2	Ground buildings	10-25	0-3	3.88-10.00
3	Port works and vessels	40	0	2.50
4	Plant, machinery and equipment	2.5-25	0-3	3.88-40.00
5	Transportation equipment	6-18	0-3	5.39-16.67

The vessels of Shandong Yancoal Shipping Co., Ltd. are depreciated over 18 years. All the other transportation equipments are depreciated over 6 to 9 years.

Land category refers to that of overseas subsidiaries and no depreciation is provided for as the subsidiaries enjoy the permanent ownership.

- (6) The Company shall review the useful life and estimated net residual value of a fixed asset and the depreciation method applied at least at each financial year-end. A change in the useful life or estimated net residual value of a fixed asset or depreciation method used shall be treated as a change in an accounting estimate.

10. Fixed assets – continued

- (7) Fixed assets that cannot bring economic returns after treatment or are not expected to bring economic returns after use or treatment shall be no longer recognized. When a fixed asset is sold, transferred, scrapped or damaged, the enterprise shall recognize the amount of any proceeds on disposal of the asset net of the carrying value and related taxes in profit or loss for the current period.
- (8) Recognition basis and measurement method of fixed assets by financial lease: Finance lease is a lease that substantially transfers all risks and rewards relating to ownership of an asset. Fixed assets by financial lease are recognized at the lower of fair value of the assets and the present value of minimum lease payment. The leased assets shall be depreciated at a straight-line basis over the shorter of service life and leasing term. The net income, from sales and leaseback transaction which has been recognized as financial lease, shall be recorded as deferred revenue on balance sheet, be amortized at a straight-line basis over the leasing term and recognized in the income statements.

11. Construction in progress

- (1) the pricing approach of the construction in progress: To be measured at the actual costs incurred for the construction. The self-operated construction is recorded at all cost of direct materials, direct salary, and direct construction expenditures etc. And the contracting construction is recorded at the payable construction cost and so on. The equipment installation cost is measured at value of the installed equipment, installation cost, all expenses incurred for project test-run. The cost of construction in progress includes capitalized borrowing costs, gain and loss from currency exchange.
- (2) Standard and time of transfer from the construction in progress to the fixed assets: The construction in progress shall be transferred to the fixed assets from the date of starting its estimated usable condition based on their construction budget, construction pricing or project actual cost and so on, and its depreciation will begin from the next month. The difference of the fixed assets original values shall be adjusted upon the resolution procedures of the project completion.

12. Borrowing costs

Borrowing costs include loan interests, amortization of premiums or discounts, auxiliary expenses and exchange differences arising on foreign currency borrowing. When expenditures for the asset and borrowing costs are being incurred, activities relating to the acquisition, construction or production of the asset that are necessary to prepare the asset for its intended use or sale have commenced, borrowing costs, which are directly attributable to the acquisition, construction or production of a qualifying asset, shall be capitalized. Capitalization of borrowing costs shall be discontinued when acquired and constructed production is available for use or sale. Other borrowing costs shall be recognized as costs for the current period.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

12. Borrowing costs – continued

The amount of interest of specific borrowings occurred for the period shall be capitalized after deducting bank interest earned from depositing the unused borrowings or any investment income on the temporary investment. The capitalized amount of general borrowings shall to be determined at the basis that the weighted average (of the excess amounts of cumulative assets expenditures above the specific borrowings) times capitalization rate (of used general borrowings). The capitalization rate shall be determined according to the weighted average interest rates of general borrowings.

Assets eligible for capitalization represent fixed assets, investment property, inventories, etc, which shall take a long time (generally above one year) for acquisition, construction or production to be ready for the specific use or sale.

If an asset eligible for capitalization is interrupted abnormally and continuously more than 3 months during the purchase, construction or production, capitalization of borrowing costs shall be suspended until the above interrupted activities restart.

13. Intangible assets

- (1) The pricing method of intangible assets: The intangible assets of the Group include mainly mining rights, unproved mining interests, expenditure for the exploration and evaluation, the land use rights, patents and techniques etc. For purchased intangible assets, actual paid cost and other relevant expenses are used as the actual cost. For intangible assets invested by investors, the actual cost is determined according to the values specified in the investment contract or agreement, while for the unfair agreed value in contract or agreement, the actual cost is determined at the fair value.
- (2) The land use rights are evenly amortized over the transferred term since the rights are obtained. The mining rights are amortized under straight line or units of production method. The patent and technology with limited life shall be amortized under composite life method. The patent and technology with unsure life shall not be amortized. The amortized amounts shall be included in the cost of related assets or profit or loss for the period in which they are incurred based on the beneficiary objects.
- (3) For an intangible asset with a finite useful life, the Company shall review the useful life and the amortization method applied at each financial year-end. A change in the useful life or amortization method used shall be accounted for as a change in an accounting estimate. For an intangible asset with an indefinite useful life, the Company shall reassess the useful life of the asset in each accounting period. If there is evidence indicating that the useful life of that intangible asset is finite, the Company shall amortize that intangible asset over the estimated useful life.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

14. Exploration and evaluation expenditures

Exploration and evaluation activities include the search for mineral resources, identification of the technical feasibility and evaluation of the commercial feasibility of the distinguished resource. Exploration and evaluation expenditures includes the direct costs of the following activities: research and analysis of historical exploration data; data collection from the topography, geochemical and geophysical exploration and research; exploration drilling, trenching and sampling; identifying and reviewing the amount and level of resources; measuring transport and infrastructure requirements; and conducting market and financial research.

In the early stages of projects exploration, exploration and evaluation expenditures occurred is credited to profit or loss are incurred. When the project has the technical feasibility and commercial viability, the exploration and evaluation expenditure (including the costs incurred for purchase of exploration permit) are capitalised into exploration and evaluation assets by a single item.

Exploration and evaluation assets are allocated to construction in progress. These assets shall be converted into fixed assets or intangible assets when getting ready for their intended use, and accrued depreciation or amortization within operating life. The related unrecoverable cost shall be immediately written off and credited as profit or loss when projects are abandoned.

15. Impairment of non-financial assets

The Company assesses at each balance sheet date whether there is any indication that the long-term equity investments measured by equity method, investment property, fixed assets, and construction in progress and intangible assets with finite useful life may be impaired. If there is objective evidence that one or more events that occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset which can be reliably estimated, a financial asset is impaired. Goodwill arising in a business combination and an intangible asset with an indefinite useful life shall be tested for impairment annually, irrespective of whether there is any indication that the asset may be impaired. For the purpose of impairment assessment, goodwill shall be considered together with the related asset groups or sets of asset group allocated with goodwill should be assessed for impairment at each financial year-end.

If the recoverable amount of the asset groups or set of asset groups is less than the book value, the difference will be recognized as impairment loss and once an impairment loss is recognized, it shall not be reversed in a subsequent period. The recoverable amount of an asset is the higher of its fair value cost of disposal and the present value of the future cash flows expected to be derived from the asset costs of disposal.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

15. Impairment of non-financial assets – continued

The signs of impairment are as follows:

- (1) The current market price of an asset substantially declines, exceeding obviously the expected decline caused by time changes or normal application.
- (2) The current or future significant changes in the economic, technical or legal environment of the enterprise and in the market of an asset shall have adverse impacts on the enterprise.
- (3) The improved market rate or other return on investment in the period shall have an effect on the discount rate used by enterprise to calculate estimated cash flow present value, leading to substantial decline in recoverable amount of assets.
- (4) There is evidence to demonstrate that the assets have already gone absolute or its entity has already been damaged.
- (5) the assets have already been or will be left unused, or will stop using, or are under the plan to be disposed in advance.
- (6) the evidences of internal reports demonstrate that economic returns of assets have already been lower or will be lower than expectations, for example, net cash flow created by assets or operating profit (or loss) realized by assets are much lower (or higher) than expected amounts.
- (7) Other signs to indicate that assets value have already been impaired.

16. Goodwill

Goodwill means equity investment cost or the differences between the merger costs and the shareholder's equity book value of the combined party under the corporate merger not under the same control.

Goodwill related to subsidiaries shall be presented separately in consolidated financial statements, to joint ventures or associated companies shall be included in the book value of long-term equity investment.

17. Long-term deferred expenses

The Group's long-term deferred expenses means mining rights compensations, project maintenance expense and other expense, which should be undertaken in more than 1 year of amortization period (not including 1 year) of the current and future periods, the expenses shall be amortized averagely in the benefit period. If the project of long-term deferred expenses cannot make benefit in the future accounting periods, the unamortized value of the project will be transferred to the profits or losses for the period.

18. Employee benefits

In the accounting period in which an employee has rendered service to the company, the company shall recognize the employee benefits payable for that service as a liability, and recorded into related assets or current profit or loss in accordance with the objects that benefited from the service rendered by employees. Any compensation liability arising from the termination of employment relationship with employees should be charged to the profit or loss for the current period.

Mainly include salary, bonus, allowance and subsidy, employee welfare expenses, social insurance cost, public accumulation fund for housing construction, labour union expenditures, employee education funds and other expenses associated with service rendered by employees.

19. Estimated liability

(1) The recognition principles of the estimated liability: the Company recognizes it as a provision when an obligation related to an contingency such as reclamation, disposal and environment restoring caused by mining, external guarantee, pending litigation or arbitration, product quality warranty, downsizing scheme, loss contract, restructuring obligation and so on satisfy all of the following conditions:

- 1) The obligation is a present obligation of the Company;
- 2) It is probable that an outflow of economic benefits from the Company will be required to settle the obligation;
- 3) The amount of the obligation can be measured reliably.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

19. Estimated liability – continued

- (2) The measurement approaches of the estimated liability: the estimated liability is primarily measured according to the estimated optimal value paid to implement the relevant present obligations considering the factors such as the risks, uncertainties and currency time values related to the contingencies. If the currency time value has major effects, the estimated optimal value is determined after the discounting of the relevant future cash flow. If any change happens to the estimated optimal value during reviewing the carrying amount of the estimated liabilities on the balance sheet date, the adjustment will be made to the carrying amount to reflect the current estimated optimal value.

20. Special reserves

(1) Provision for production maintenance and production safety expenses

Pursuant to the rules and regulations jointly issued by Ministry of Finance, State Administration of Coal Mine Safety and related government authorities in PRC, the Company has to accrue for production maintenance expenses (Wei Jian Fei) at RMB6 per ton of raw coal mined, which is used to maintain production and technical improvement of coal mines. The Company also accrues for production safety expenses at RMB8 per ton raw coal mined (standards for the Company's subsidiary Shanxi Heshun Tianchi Energy Company Limited is RMB15 per ton raw coal mined) and is used for purchase of coal production equipment and safety expense of coal mining structure.

In accordance with the regulations of “the Interim Measures of financial management of costs of safety in the high-risk industries and enterprises “ (Caiqi [2006] No. 478) of the Ministry of Finance and the State Administration of Work Safety, as the subsidiaries of the Group, Hua Ju Energy has a commitment to incur Work Safety Cost at the rate of: 4% of the sales income for the year below RMB10 million; 2% of the actual sales income for the year between RMB10 million and RMB100 million (included); 0.5% of the actual sales income for the year between RMB100 million and RMB1 billion (included); 0.2% of the actual sales income for the year above RMB1 billion.

The above accrued amounts, which have been charged in cost and unused, shall be presented separately in special reserves of shareholder's equity. Production safety expenses, which belong to cost of expenses, directly offset of special reserves. The accrued production safety expenses, which is used by enterprises and formed into fixed assets, shall be charged in “construction in progress”, and recognised as fixed asset when safety project is completed and reaches the expected operation condition; meanwhile, offset the special reserves according to the cost forming into fixed asset, and recognise the same amount of accumulated depreciation. This fixed asset shall no longer accrue depreciation in the following period.

(2) Shanxi coal mines switching to other business development fund

Pursuant to Shanxi Coal Mine Switching to Other Business Development Fund Provision and Use Management Methods (Pilot) (Jinzhengfa [2007] No.40), since May 1, 2008, the subsidiary Shanxi Heshun Tianchi Energy Co., Ltd. accrues RMB5 per ton ROM for Coal Mine Switching to Other Business Development Fund.

(3) Shanxi environment management guarantee deposit

Pursuant to Notice of Provision and Use Management Method of Shanxi Coal Mine Environment Rehabilitation Management Guarantee Deposit (Pilot) (Jinzhengfa [2007] No.41) issued by Shanxi Provincial People's Government, the subsidiary Shanxi Heshun Tianchi Energy Co., Ltd. Accrues RMB10 per ton ROM for the Environment Rehabilitation Management Guarantee Deposit since May 1st, 2008. The provision and use of the deposit will abide by the following principals of "owned enterprises, used only for special purpose, saved in special account and supervised by government".

21. The Principles of Revenue recognition

The business revenues are generated mainly from sales of goods, rendering of services and alienating the right to use assets. The principles of revenue recognition are as follows:

(1) Revenue from sales of goods:

Revenue is recognized when the Company has transferred to the buyer the main risks and rewards of ownership of the goods, neither retains continuing management usually associated with ownership nor effectively controls over the goods sold, and the amount of revenue can reliably measured, the associated economic benefits are likely to flow into the enterprise, and the related to costs incurred can be reliably measured.

(2) Revenue from rendering of services:

When the provision of services is started and completed within the same accounting year, revenue is recognized at the time of completion of the services. When the provision of services is started and completed in different accounting years and the outcome of a transaction involving the rendering of services can be estimated reliably, revenue is recognized at the balance sheet date by the use of the percentage of completion method.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

21. The Principles of Revenue recognition – continued

(3) Revenue from alienating the right to use assets

The revenue is recognized when the Company has received the economic benefits associated with the transaction, and can reliably measure the relevant amount of revenue.

22. Government grants

Government grants are recognized when there is reasonable assurance that the grants will be received and the Group is able to comply with the conditions attaching to them. Government grants in the form of monetary assets are recorded based on as the amount received, whereas quota subsidies are measured as the amount receivable. Government grants in the form of non-monetary assets are measured at fair value or nominal amount (RMB1) if the fair value cannot be reliably obtained.

Government grants received in relation to assets are recorded as deferred income, and recognised evenly in the income statement over the assets' useful lives. Government grants received in relation to revenue are recorded as deferred income, and recognised as income in future periods as compensation when the associated future expenses or losses arise; or directly recognised as income in the current period as compensation for past expenses or losses.

23. Deferred income tax assets and liabilities

The deferred income tax assets and liabilities are recognized based on the differences arising from the difference between the carrying amount of an asset or liability and its tax base (temporary differences). For any deductible loss or tax deduction that can be deducted the amount of the taxable income the next year according to the taxation regulations, the corresponding deferred income tax asset shall be determined considering the temporary difference. On the balance sheet date, the deferred income assets and deferred income tax liabilities shall be measured at the tax rate applicable to the period during which the assets are expected to be recovered or the liabilities are expected to be settled.

The Group shall recognize the deferred income tax liability arising from a deductible temporary difference to the extent of the amount of the taxable income which it is most likely to obtain and which can be deducted from the deductible temporary difference. For the recognized deferred income tax asset, if it is unlikely to obtain sufficient taxable income to offset against the benefit of the deferred income tax asset, the carrying amount of the deferred income tax assets shall be written down. Any such write-down should be subsequently reversed where it becomes probable that sufficient taxable income will be available.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

24. Leases

The Company classifies the leases into finance lease and operating lease on the lease beginning date.

Finance lease is a lease that substantially transfers all the risks and rewards incident to ownership of an assets. On the lease beginning date, as the leaseholder, the Company recognizes the lower of fair value of lease assets and the present value of minimum lease payment as financial leased fixed assets; recognizes the minimum lease payment as long-term payable, and recognizes the difference between the above two as unverified financing costs.

Operating lease is the other lease except finance lease. As the leaseholder, the Company records lease payments into the related assets cost or the profit or loss for the period on a straight-line basis over the lease term and; records lease income into revenue in the income statement on a straight-line basis over the lease term.

25. Accounting calculation of the income tax

The accounting calculation of the income tax adopts the balance sheet liabilities approach. The income taxes include the current and deferred income tax. The current income tax and deferred income tax expenses and earnings are recorded into the current profit and loss, except those related to the transactions and events are recorded directly into the shareholder's equity and the deferred income tax is adjusted into the carrying amount of goodwill arising from the business combination.

The current income tax expense is the income tax payable, that is, the amount of the current transactions and events calculated according to the taxation regulations paid to the taxation authorities by the enterprises. The deferred income tax is the difference between the due amounts of the deferred income tax assets and liabilities to be recognized according to the balance sheet liabilities approach in the period end and the amount recognized originally.

26. Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organization, management requirements and internal reporting system. An operating segment is a component of the Group that meets the following respective conditions:

- (1) Engage in business activities from which it may earn revenues and incur expenses;
- (2) Whose operating results are regularly reviewed by the Group's management to make decisions about resource to be allocated to the segment and assess its performance; and
- (3) For which financial information regarding financial position, results of operations and cash flows are available.

27. Operation Method of Hedges Business

The Group's overseas subsidiaries use derivative financial instruments such as forward foreign exchange contracts, coal swap contracts, interest rate swaps contracts to hedge cash flow for foreign exchange risks, fluctuations in coal prices and interest rate risk.

The relationship between hedging instrument and hedged item is recorded by the Group on hedging transaction date, including the target of risk management and various hedging transaction strategies. The Group will regularly assess whether the derivatives can continuously and effectively hedge cash flows of the hedged item during the period of hedging transactions. The Group uses the comparative method of the principle terms of the contract to do the expected evaluation on the effectiveness of hedging, and uses ratio analysis method to do the retrospective evaluation on the effectiveness of hedging at the end of the reporting period.

Net amounts receivable or payable of hedging transactions is recorded into the balance sheet as assets or liabilities from hedging transaction date. The unrealized gain or loss shall be recorded into hedging reserve under equity. The change of fair values of forward foreign currency contract, coal swap contract or interest swap contract shall be recognized through hedging reserve until the expected transactions occur. Accumulated balance in equity shall be included in the income statement or be recognized as part of the cost in relation of its assets.

When a hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting, the hedge accounting shall not be applicable. Accumulated gain or loss of hedging instruments is recorded in the equity and recognized when transaction happens. Accumulated gain or loss, which is recorded in shareholder's equity, shall be transferred in the profit or loss for the period if transaction is not expected to make.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

28. Business combinations

A business combination is a transaction or event that brings together of separate enterprises into one reporting entity. The Company recognizes the assets and liabilities arising from the business combinations at the combinations date or acquisition date. Combinations date or acquisition date is the date on which the absorbing party effectively obtains control of the party being absorbed.

- (1) *Business combinations involving enterprises under common control:* Assets and liabilities that are obtained by the absorbing party in a business combination are measured at their carrying amounts at the combination date as recorded by the party being absorbed. The difference between the carrying amount of the net assets obtained and the carrying amount of the consideration paid for the combination is adjustment to capital reserve. If the capital reserve is not sufficient to absorb the difference, any excess shall be adjusted against retained earnings.
- (2) *Business combinations not Involving enterprises under common control:* The cost of combination for a business combination not involving enterprises under common control is the aggregate of the fair values, at the acquisition date, of the assets given, liabilities incurred or assumed, and equity securities issued by the acquirer. Where the cost of a business combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable assets, liabilities and contingent liabilities acquired, the difference shall be recognized as goodwill. Where the cost of combination is less than the acquiree's interest in the fair value of the acquiree's identified assets, liabilities and contingent liabilities acquired, after the reviewing, the acquirer shall recognize the remaining difference immediately in profit or loss for the current period.

29. Preparation methods for consolidated financial statements

- (1) The consolidated scope recognition principles: the Company takes the subsidiaries owning the actual controlling power and the main bodies for the special purpose into the scope of the consolidated financial statements.
- (2) The accounting methods introduced in the consolidated financial statements: The consolidated financial statements are prepared pursuant to *Enterprises accounting criteria No.33 – consolidated financial statements* and relevant provisions. All major inter-segment transactions, balances, income and expenses in the consolidation scope are eliminated in full on consolidation. Unrealized loss from inter-segment transactions shall, if there is evidence that the loss is part of the related impairment, be recognized in full. Shareholder's equity in the net assets of consolidated subsidiaries is identified separately from the Group's equity therein.

29. Preparation Methods For Consolidated Financial Statements – continued

If the losses to the minority shareholders exceed their shares in the subsidiary's equity, in addition to the part that minority shareholders have an obligation to bear according to the articles of association or agreement and the minority shareholders have the ability to bear, the remaining part shall offset the shareholders' equity of the parent company. If the subsidiary subsequently reports profits, all profits are attributable to shareholders equity of the parent company before compensating the losses to the minority shareholders which were borne by the shareholders' equity of the parent company.

If any conflicts between the accounting policies or the accounting period introduced in the subsidiaries and those of the Company, the necessary adjustment shall be made to the financial statements of the subsidiaries according to the accounting policies or the accounting period in the Company during the preparation of the consolidated financial statements.

For those subsidiaries acquired not under common control, some few financial statements are adjusted based on the fair values of the identifiable net assets after the acquisition date in preparing consolidated financial statements. For those subsidiaries acquired under common control, which are considered to be existed at the opening of the consolidation period, the assets, liabilities, the operating results and cash flows from the opening of the consolidation period are presented in the consolidated financial statement according to the original carrying amounts.

30. Common control operation

There is common control operation in overseas subsidiaries of the Company. Common control operation means that a company uses its assets or other economic resources with other cooperative parties to jointly do coal exploration, development, operation, or other economic activities, and jointly control these economic activities in accordance with contracts or agreements.

The overseas subsidiaries are entitled to the profits created by joint controlled assets as per the shares controlled by them, and they shall recognize revenue and costs in relation to common control operation in light of contracts or agreements.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

31. Significant accounting policies and accounting estimates

When use the above mentioned accounting policies and accounting estimate, because of the uncertainty of operation, the Group needs to apply the judgments, estimates and assumptions to book value of inaccurate measured items, which was made on the basis of experiences of the management and consideration of other related factors. However, the actual conditions are possibly different from the estimates.

The Group makes regulatory check on above mentioned judgments, estimates and assumptions. The Company confirms the influences of the accounting modifications in the current and future of the modification time, dependently.

On balance sheet date, the key assumptions and the uncertainties leading to the possible major adjustments for the carrying amounts of the assets, liabilities in the future are as follows:

(1) Depreciation and amortization

Fixed assets and intangible assets are depreciated and amortized on the straight-line or production basis over their useful lives. The Group shall regularly review the useful lives and economically recoverable coal reserves to determine the total amount of depreciation and amortization which will be included in each period. Useful lives are calculated on the basis of the experience from similar assets and expected change of technology. Economically recoverable coal reserves are calculated by the economically recoverable coal resources based on actual measurement. If the past estimates change significantly, the depreciation and amortization shall be adjusted during future periods.

Estimates of coal reserves are involved in subjective judgment, because the estimating technology is inaccurate, so the coal reserves are only approximate value. The recent production and technology documents shall be considered for the estimates of economically recoverable coal reserves which will be updated regularly, the inherent inaccuracy of technical estimating exists.

(2) Land subsidence, restoration, rehabilitation and environmental obligations

The Company needs to relocate the villages on the surface due to the underground coal mining, and bear the cost of relocation of villages, ground crops (or attachments) compensation, land rehabilitation, restructuring and environmental management and other obligations. The performance of obligation is likely to lead to outflow of resources, when the amount of the obligation can be measured reliably, it is recognized as an environmental reclamation obligations. Depending on the relevance with the future production activities and the reliability of the estimated determination, the flow and non-flow reclamation provision should be recognized as the profit and loss for the period or credited to the relevant assets.

IV. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES AND PREPARATION METHODS FOR CONSOLIDATED FINANCIAL STATEMENTS – CONTINUED

31. Significant accounting policies and accounting estimates – continued

(2) Land subsidence, restoration, rehabilitation and environmental obligations

After taking into account existing laws and regulations and according to the past experience and the best estimate of future expenditures, management determines Land subsidence, restoration, rehabilitation and environmental obligations. If the time value of money is material, the expected future cash outflows will be discounted to its net present value. Following the current coal mining activities and under the condition that the future impact on land and the environment has become evident, Land subsidence, restoration, rehabilitation and environmental costs may be amended from time to time. Discount rate used by the Group may change due to assessment on the time value of money market and debt specific risks, when the estimate of the expected costs changed, it will be adjusted accordingly by the appropriate discount rate.

(3) Impairment of non-financial long-term assets

As described in note 4 (16), at the date of the balance sheet the Group assesses impairment of non-financial assets to determine whether the recoverable amount of assets fell less than its carrying value. If the carrying value of the asset exceeds its recoverable amount, the difference is recognized as impairment loss.

The recoverable amount is the higher between the net amounts of fair value of the assets (or assets group) less disposal costs and the estimated present value of future cash flow of the assets (or assets group). As the Group cannot reliably access the open market price of the assets (or asset group), it is not reliable and accurate to estimate the fair value of assets. When estimating the present value of future cash flows, the company needs to make significant judgments on the future useful life, the product yield, price, the related operating costs of the assets (or assets group) and the discount rate used for calculating the present value. When estimating the recoverable amount, the Group will use all possibly available information, including the product yield, price from the reasonable and supportable assumption and the forecast related to operating costs.

(4) Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate the present value. Expectation has been determined based on past performance and management's expectations for the market development.

V. CHANGE OF ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES AND CORRECTION OF EARLY ERRORS

1. Changes of accounting policies and the impact

During the reporting period, the Group made no changes in accounting policies.

2. Changes in accounting estimates

During the reporting period, the Group made no Changes in accounting estimates.

3. Amendments of significant retrospective errors and the impact

During the reporting period, the Group made no amendments of significant retrospective accounting errors.

VI. TAXES

1. The major tax categories and tax rate applicable to the Group and domestic subsidiaries are as follows:

(1) Income tax

Income tax is calculated at 25% of the total assessable income of the companies of the Group that registered in PRC.

(2) Value added tax

The value added tax is applicable to the product sales income of the Company and domestic subsidiaries. The value added tax is paid at 17% of the corresponding revenue on coal and other commodities sales, except for the value added tax on revenue from heating supply is calculated at 13%. The value added tax payable on purchase of raw materials and so on can offset the tax payable on sales at the tax rate of 17%, 13%, 7%, 3%. The value added tax payable is the balance between current tax payable on purchase and current tax payable on sales.

Pursuant to State Council Regulation No.538 “PRC Value Added Tax Temporary Statute” (Revised), value added tax paid for the purchase of machinery and equipments can offset the tax payable on sales from January 1, 2009.

Pursuant to the Document (Caishui [2006] No.139) which was jointly issued by the Ministry of Finance and the State Administration of Taxation, the coal product export refund tax preferential was cancelled and the value added tax export refund rate was 0%.

According to the approval of “Ji Guo Shui Liu Pi Zi (2009) Document No.1 of State Administration of Taxation in Jining City”, as the subsidiary of the Company, Hua Ju Energy adopts the taxation policy of levy and refund 50% on VAT of electricity power and heating.

VI. TAXES – CONTINUED

1. The major tax categories and tax rate applicable to the Group and domestic subsidiaries are as follows – continued:

- (2) **Value added tax – continued**

According to the approval of “Ji Guo Shui Liu Pi Zi (2010) Document No.1 of State Administration of Taxation in Jining City”, as the subsidiary of the Company, Hua Ju Energy adopts the taxation policy of levy and refund 50% on VAT of electricity power and heating.

- (3) **Business tax**

Business tax is applicable to coal transportation service income of the Group and domestic subsidiaries. Business tax is paid at the 5% of the corresponding revenue, except the business tax on revenue from coal transportation service is calculated at 3%.

- (4) **City construction tax & education fee**

Subject to all taxes applicable to domestic enterprise according to the “Reply Letter to Yanzhou Coal Mining Co., Ltd.” issued by State Administration of Taxation (Guoshuihan [2001] No.673), city construction tax and education fee are still calculated and paid at 7% and 3%, respectively, on the total amount of VAT payable and business tax payable.

- (5) **Resource tax**

Pursuant to the “Notice of the adjustment of resource tax amount of Shandong province” (Caishui [2005] No.86), which was jointly issued by the Ministry of Finance and the State Administration of Taxation, resource tax in Shandong province is calculated and paid at the amount of RMB3.60 per tonne.

(2) Other current liabilities

Items	At June 30, 2011	At January 1, 2011
Land subsidence, restoration, rehabilitation and environment costs (Note1)	2,761,897,045	2,297,502,144
TOTAL	2,761,897,045	2,297,502,144

Note 1: The consequence of coal mining activities is land subsidence caused by the exploitation of the underground mining sites. Depending on the circumstances, the Company may relocate inhabitants from the land above the underground mining sites prior to mining those sites or the Company may compensate the inhabitants for losses or damages from land subsidence after the underground sites have been mined. Based on the past experience, the management accrued the reserve according to the coal exploitation during the reporting period, which may generate the likely result of land subsidence, restoration, rehabilitation, and environment costs in the future.

Considering the time difference between the payment of relocation, land subsidence, etc. and the underground mining below the corresponding land, if the accumulated payment is more than the accruals provided, such excess of payment would be presented under current assets at the period end; if the accumulated payment is less than the accruals provided, and such shortage of payment would be presented under current liabilities at the period end.

For the current reporting period, other current liabilities increased by 20%, mainly due to that actual accrued land subsidence, restoration, rehabilitation and environment costs exceed actual payment.

Note 2: The overburden on the coal seam of open-pits owned by overseas subsidiaries shall be removed, which will result in removal costs. Removal costs shall be recorded as profits or losses when respective coal seam is mined.

XIV. OTHER IMPORTANT EVENTS

1. Mining rights

According to the Mining Rights Agreement signed between the Company and the Group in October, 1997 and supplementary agreement signed in February, 1998, an annual fee as compensation for mining rights of five coal mines owned by the Yankuang Group is RMB12.98 million which is subject to new regulations after a ten-year period if they come out.

Pursuant to *Implement Scheme about Experimental Units of Coal Mining Rights Paid* which was approved by the State Council and jointly issued by the Ministry of Finance, State Resources Department and Development and Reformation Committee in September, 2006, despite free mining rights developed and invested by the country, enterprises should pay mining price on the base of reevaluation on remaining resource reserves. Shandong Province is one of the experimental provinces carrying paid mining rights. By the reporting day, the Company has been making assessment on remaining reserves. Pursuant to decision made in the sixth meeting of the Forth Board, compensation fee of RMB5 is accrued at per ton raw coal minded for the five coal mines owned by the Company, which is subject to detailed scheme when it comes out. RMB140.71 million has been accrued according to this criterion for the year of 2010. RMB70.67 million has been accrued according to this criterion during the period from January1, 2011 to June 30, 2011.
